

GroAurum

Admin Delivery Management v1

Last-mile wholesale delivery operations console

Generated: July 16, 2026

apps/admin-web · UI shell only · Phase 3 adapters (af9e616)

This is NOT a driver directory. Operators manage routes, vehicles, stop execution, COD collections, and delivery performance.

1. Purpose

Provide administrators with a Delivery Operations Console inside the GroAurum Admin shell. Sidebar navigation is unchanged; Delivery replaces the placeholder module. Focus is last-mile wholesale execution - not fleet HR.

2. Design Principles

- Professional SaaS, desktop-first, high information density
- GroAurum Design System - white cards, green branding, 8px spacing
- Typed fixtures only - no backend mutations in v1
- Reusable admin components (Card, Badge, Button, Tabs, KPI cards)
- Do not redesign prior modules (Dashboard through Salesman Management)

3. Delivery Dashboard KPIs

Route: /delivery

- Active Routes
- Vehicles Running
- Orders Out For Delivery
- Deliveries Completed
- Pending COD Collections
- Failed Deliveries

4. Delivery Route List

Column	Meaning
Route ID	Route code - links to detail
Driver	Assigned field driver
Vehicle	Vehicle registration
Delivery Area	Coverage geography
Orders Assigned	Stops on the route
COD Amount	Cash expected on route
Route Status	Planned / Loading / Running / Completed / Cancelled
Updated	Last activity stamp

Browse supports Search (route / driver / vehicle / area), Status filter, Sort (Route A-Z, Orders, COD, Updated), and Pagination.

5. Route Detail

Route: /delivery/:routeId

- Overview - route number, driver, vehicle, warehouse, area, departure, expected completion, status
- Assigned Orders - order, customer, area, amount, payment, delivery status; View / Mark Delivered / Skip Delivery
- Timeline - Route Created, Vehicle Loaded, Departed Warehouse, Delivering, Completed, Cancelled
- Collections - COD expected, collected, pending, and history
- Performance - delivered, success rate, avg time, failed, customer rating (future)
- Vehicle - number, driver, capacity, status

6. Route Status Model

- Planned - route built, not yet loading
- Loading - vehicle being packed at warehouse
- Running - departed and delivering stops
- Completed - route closed
- Cancelled - aborted before or during execution

7. Quick Actions

- Create Route
- Assign Driver
- Assign Orders
- Close Route
- Export Manifest

Actions are UI stubs in v1 - they focus related tabs. Mutations deferred.

8. Timeline Stages

- Route Created
- Vehicle Loaded
- Departed Warehouse
- Delivering
- Completed
- Cancelled

9. Performance Cards

- Orders Delivered
- Delivery Success Rate
- Average Delivery Time
- Failed Deliveries
- Customer Rating (future placeholder)

10. Data Preparation

```
apps/admin-web/src/data/delivery-types.ts
apps/admin-web/src/data/delivery-fixtures.ts
# DELIVERY_SNAPSHOT_FIXTURE + DELIVERY_ROUTE_DETAIL_FIXTURES
# browseDeliveryRoutes() for search / filter / sort / pagination
# Replace with Supabase route / vehicle / stop queries
```

11. Files

- pages/delivery/DeliveryListPage.tsx - KPIs, browse, route table
- pages/delivery/DeliveryDetailPage.tsx - six-tab operations console
- components/delivery/* - badges, browse, table, tabs, timeline
- App.tsx - /delivery and /delivery/:routeId routes

12. Validation

Check	Result
pnpm --filter @groaurum/admin-web typecheck	Pass
pnpm --filter @groaurum/admin-web build	Pass
Sidebar / prior modules	Unchanged
Backend mutations	Not implemented (by design)

13. How to Review

```
pnpm dev:admin
# Open http://localhost:5173/delivery
# RT-D14 - running, full stops + COD
# RT-S08 - loading at warehouse
# RT-N02 - cancelled / maintenance vehicle
```

14. Out of Scope

- Supabase create route / assign / mark delivered / close mutations
- Live GPS tracking or map-based route editing
- Driver payroll, attendance, or fleet maintenance workflows
- Customer delivery rating capture (placeholder only)

15. Intent

Delivery Management should feel like a last-mile operations console for wholesale distribution: see which routes are running, what is

on the vehicle, COD still outstanding, and how the day is performing - not a driver employee list.
