

# GroAurum Admin ERP

## Application Progress Summary

Through Sprint 3.5 - Smart Order Workflow Automation

Generated 2026-08-10

### 1. What this document covers

---

Stakeholder summary of GroAurum Admin ERP order operations after Sprint 3.5. Focus: fewer admin clicks, automatic timeline, delivery PWA status updates, and a single next-action button on Order Details.

### 2. Sprint 3.5 objective

---

Redesign the Orders workflow so the system advances the order lifecycle whenever possible. Admins complete an order with the fewest actions.

- Timeline is history only (read-only, automatic).
- Only one primary action is shown at a time (Action Panel).
- Delivery PWA auto-updates Out For Delivery and Delivered.
- Payment unlocks Convert To Sale.
- Invoice: seller left / buyer right; no salesman; no GST.

### 3. Operator path (typical)

---

Confirm Order

- > Print Invoice (auto: invoice printed + timeline)
- > Pack Order (auto: Packed / Ready for Dispatch)
- > Assign Delivery Boy (auto: Assigned + route)
- > [Driver starts route] auto Out For Delivery
- > [Driver confirms] auto Delivered
- > Receive Payment unlocks Convert To Sale
- > Convert To Sale sale + final PDF + Completed

### 4. What admin no longer clicks

---

- Manual timeline stage buttons (Confirm/Pack/OFD/Delivered/etc. as a chain).
- Out For Delivery (Delivery PWA starts the route).
- Confirm Delivery from admin (Delivery PWA completes the stop).
- Scattered multi-button toolbar on Order Details.

### 5. Action Panel states

---

- Pending -> Confirm Order
- Confirmed -> Print Invoice
- Invoice Printed -> Pack Order
- Packed -> Assign Delivery Boy
- Assigned -> Waiting for Driver (no button)
- Out For Delivery -> Waiting for delivery confirmation
- Delivered (unpaid) -> Receive Payment
- Paid -> Convert To Sale
- Completed -> no workflow button

### 6. Invoice & print

---

- Header ~10%: Seller (logo, company, address, phone, email) | Buyer details.
- Salesman removed from invoice.
- GST removed (subtotal / discount / grand total only).
- Sizes: A4, A5, A6, Thermal. Preview matches print; multi-page when needed.

## 7. Performance

---

- React Query optimistic updates on confirm, print, pack, assign, pay, convert.
- Background refetch after mutations - no full page reload.

## 8. How to run

---

pnpm dev:admin

Open <http://localhost:5173/> -> Orders -> open an order

Use the Action Panel for the next step only

Trusted workflow RPCs (Sprint 3.4) remain required: `admin_advance_order_to`, `admin_assign_order_delivery`, `admin_mark_payment_received`. If DB is behind: `pnpm db:start && pnpm db:reset`.

## 9. Acceptance checklist

---

- [x] Timeline fully automatic and read-only
- [x] Admin does not click every workflow stage
- [x] Only one primary action at a time
- [x] Delivery PWA updates delivery status
- [x] Payment unlocks Convert To Sale
- [x] Cleaner Order Details + improved invoice
- [x] Fewer clicks / production-ready wholesale flow
