

GroAurum

Customer Catalogue v1

Professional wholesale product catalogue

Generated: July 16, 2026

Aligned with Home / Restock / Review Order / Order Timeline v1 · Phase 3 adapters (af9e616)

This is NOT a consumer grocery catalogue. Retailers browse active SKUs with trade prices, MOQ, and selling-unit actions - no banners, coupons, wallet, or ads.

1. Purpose

Provide a professional wholesale product catalogue for retailers to search, filter, sort, and add SKUs to today's order. Replaces the prior Search tab with a dedicated Catalogue tab at /(tabs)/catalogue.

2. Design Principles

- Professional B2B, calm hierarchy, GroAurum design language
- 8px spacing grid
- No banners, coupons, wallet, or ads
- Home, Restock, Review Order, and Order Timeline were not redesigned

3. Screen Layout

- Header - Catalogue title + wholesale subtitle
- Search bar - product, SKU, grade or size
- Horizontal filter chips - All, Packed, Bulk, Dry Fruits, Spices
- Sort - Trade Price, A-Z, Available (with SKU count)
- Product list - wholesale ProductCard rows
- Sticky Review order bar when the draft has lines

4. Filter Chips

Chip	Rule
All	No facet filter
Packed	CARTON / PACK selling unit, or packs-per-carton set
Bulk	KG selling unit
Dry Fruits	Category name/id maps to dry-fruit families
Spices	Category name/id maps to spices

5. Sort Options

- Trade Price - ascending trade price, then A-Z
- A-Z - product name ascending
- Available - in stock, then low stock, then out of stock; then A-Z

6. Product Card Fields

Field	Source
Product image	Catalogue mark / emoji
Product name	Product name
Grade	SKU grade / specification
MOQ	SKU moq
Packs per carton	SKU packsPerCarton when present
Selling unit	SKU unit label
Trade price	Current effective trade price
Availability	stockStatus / stock
Primary action	addActionLabel from sellingUnit + quantityStep

7. Quantity Rules

Do not hard-code carton or KG behavior in the Catalogue UI. Add / step actions use SKU configuration helpers:

```
stepSkuQuantity(product, currentQty, +1 | -1)
```

Driven only by product.moq and product.quantityStep

8. Data Rules

- Reads only active categories, products, SKUs, and current prices
- Mock adapter may include demo wholesale catalogue data
- Supabase mode: empty means empty - never falls back to mock demo products
- customer-catalogue boundary already enforces activeOnly + priced SKUs

9. Supported States

- Loading - LoadingBlock while products/categories fetch
- Error - message + Retry refetch
- Empty catalogue - no active priced SKUs
- Empty results - search/filter/sort produced no matches + Clear filters
- Search / Filter / Sort - client browse pipeline on loaded SKUs

10. Files

- apps/customer/app/(tabs)/catalogue.tsx - Catalogue v1 screen
- apps/customer/app/(tabs)/_layout.tsx - Catalogue tab (replaces Search)
- apps/customer/components/catalogue/* - search, chips, sort
- apps/customer/services/catalogue-browser.ts - filter / sort / search pipeline
- apps/customer/services/customer-catalogue.ts - active catalogue boundary
- apps/customer/components/ProductCard.tsx - selling unit meta (shared)
- apps/customer/services/mock/data.ts - Spices category for mock facet coverage

11. Navigation

- Tab bar: Home · Restock · Catalogue · Orders
- Home search field -> /(tabs)/catalogue
- Restock Browse catalogue -> /(tabs)/catalogue
- Legacy Search tab route removed

12. Validation

Check	Result
Customer app typecheck (tsc --noEmit)	Pass
Home / Restock / Review Order / Order Timeline	Layouts unchanged
Supabase empty catalogue	Shows empty, not demo data

13. How to Review

```
pnpm dev:customer
# Open Catalogue tab
# Search, filter chips, sort options
# Add SKU via primary action -> Review order bar
```

14. Out of Scope

- Consumer deal banners or promotional carousels
- Coupon / wallet / loyalty UI
- Hard-coded carton vs KG business rules in UI
- Home / Restock / Review Order / Order Timeline redesign

15. Intent

Catalogue should feel like a calm wholesale price book: searchable SKUs, clear trade terms, and SKU-driven add actions - not a Blinkit-style consumer grocery browse.
